

PrintGuardPlus®

After the first use ink is already gathering between the tiny glass beads of your PrintGuardPlus® cloth. Certainly it does not look nice, but it doesn't matter. **PrintGuardPlus® still remains fully functioning in spite**

of these discolourations for a very long time. For that purpose cleaning with a blanket cleaner and water (in a ratio of 1:1) is ideal. Don't let the ink begin to dry, and please do not use sharp, abrasive tools or clean-

ing agents; **a lint-free cloth or a soft sponge are sufficient!** Then you will benefit from the advantages of the colour-resistant silicon for a long time.

partner for success

PrintGuardPlus®

Colour-resistant silicon – please don't wipe off!

Remove and stick on your machine
