

## AC 2 and BC 5 – sharp and hot!

AC 2 and BC 5 cutters – for the best cutting results for your CITO creasing matrix

- **Clean cutting** of the creasing strips to the exact length
- Precise and reliable **45° angle cut**
- **User-friendly manually operated cutters** with lateral adjustment aid and centring guide, two models available:
- **Model AC 2:** Cutter designed for frequent use, with reliable waste ejection
- **Model BC 5:** Economic cutter for normal use

## AC 2 Cutter

Manually operated cutter with a 700 mm ruler and cursor for adjusting the creasing strip width to a neat 45° angle cut, i.e. both ends are cut at an angle at the same time.

Adjustment aid for centric setting of the angle cut.

Description	Order no.
AC 2 Cutter	BDA00001
AC 2 Replacement upper and lower blades	BDA01002

## BC 5 Cutter

The more economic version without automatic waste ejection, with a 700 mm ruler and measuring cursor for a neat 45° angle cut (both ends are cut at an angle at the same time).

Description	Order no.
BC 5 Cutter	BDB00002
BC 5 Knife head, rubberised	BDB01002

## S 80 Scissors

Scissors with stop for 45° mitre cut, for mobile and flexible use, for small quantities (e.g. directly at the diecutter); also suitable for cutting rubber profiles to length.
