CITO ULTIMATE – the art of creasing

The unique high-performance creasing matrix, film-based with flexible surface

CITO ULTIMATE offers the greatest size variety available on the market and is recognised as the leading creasing matrix worldwide. The perfect creasing system for all applications and materials – whether virgin fibre or recycled material, paper or folding cartons, laminated micro flute or corrugated board, fully imprinted, UV coated or foil laminated. Perfect handling due to Fingerlift technique and easy to trim with the knife. Outstanding adhesion on the cutting plate and residue-free removal thanks to EasyFix technology.

- Flexible coating on a stable base for constantly high crease quality, from the first to the last sheet, even for extremely large runs
- All versions with SG technology
- Reduces cracking of the crease
- Ideal for repeat jobs or for archiving in combination with cutting plates
- Available in around 600 different sizes, versions and specials
- Patented technology

PRODUCT SAFETY ISEGA Certificate No. 67969 U 26 WITH LETTER AND SEAL

Production reliability & product safety

Our certified creasing systems combine production safety with product safety.

- Safe for the manufacture of folding cartons for foods
- Conform with the EU Directive for food contact materials (EC No. 1935/2004 Art. 3 and 17)

partner for success

CITO ULTIMATE Creasing Matrix

CITO ULTIMATE

High-performance creasing matrix, film-based. With a flexible layer and extremely sharp outer edge with improved sheet transfer, greater production reliability and less reworking: the easy way to increase your productivity.

CITO ULTIMATE CMR

CITO ULTIMATE on reels. Especially suitable for the production of larger packaging and displays, cost-effective, less waste.

CITO ULTIMATE IK

Creasing system for high-value products made from corrugated board. Inside chamfering reduces tensile stress and thus avoids cracking of the surface of the material.

CITO ULTIMATE RS

When small distances between cutting and creasing rule are required (e.g. glue flaps, window cuttings), this is the ideal creasing system to use, suitable for small folding cartons.

CITO ULTIMATE CC

Special creasing system for double crease with a short distance between the creasing rules.

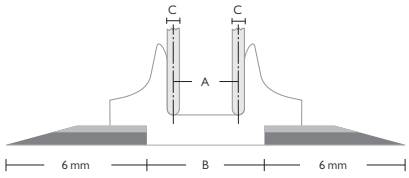

CITO ULTIMATE CS

Especially for double creases; can be used separately, extremely narrow shoulders for smallest distances between two creasing rules and knife/creasing rule, e.g. for miniature folding cartons and folders.

CITO ULTIMATE CSD

CS variant for multiple creasing rule.

CITO ULTIMATE RYU

Special double-crease without a center piece for premium 180° folding of products made from corrugated board.

CITO Abacus

Use our **Abacus web app** to calculate the ideal size of creasing system.
